My career experience:

- conflict mediator
- communication practitioner
- researcher
- business school lecturer
- businessman
- executive and team coach

Highest qualifications:

- Associated Certified Meta Coach
- MBA
- Master's degree (contemporary political history)
- Certified Public Relations Practitioner

My mission: To inspire and empower leaders and teams who want to upgrade their gameplan and lead better, work better, living a life of significance.

I value: Connection. I relate to ordinary people who want to live an extraordinary life.

My style: Challenging the stale, prompting possibilities beyond the current repertoire of thinking, being and doing. I walk side-to-side to support and remind my clients of their innate powers and potential.

I offer: My life experience, knowledge, and skills as a leadership-, business-, team coach, teacher, consultant, and councillor.

I am inspired: By the human spirit - when people realise and activate their powers for personal, professional and team successes.

I love being a guiding partner; to be the tough and trusted friend for everyday heroes.

My wish for humankind is to be wise, wild, and kind.

I am married and have three children. I am a nature lover and contemplative. I enjoy hiking, ultra trail running, marathons, and kayaking. I am curious about history, world affairs and people.

Herewith my earnest gratitude for your ability to unleash the giant within me. Your methods and professionalism speak of your calling and I always experience the positive aura when in your presence. Once again, I wish you well with being the ignitor in my and others' lives. - J.J.

Thank you for facilitating our strategic session. The team's positive response speaks volumes about the effectiveness of the session, and I am confident that it has set the stage for us to build a strong and high-performing team. We appreciate your dedication and expertise. - S.M.

I am glad to have worked with Wium to experience his perception on leadership as well as the calm and calculated way he led not only my inputs but that of the whole group. The most important thing that he helped me to achieve was to take a step back to access the situation I am dealing with in order to decide on a positive outcome for my staff and institution. - C.dT.
